Providing Support During the COVID-19 Pandemic
Direct Support Professionals 6-month follow-up survey | Tennessee profile

Direct support professionals (DSPs) provide an array of critical supports making it possible for people with intellectual and developmental disabilities (IDD) to live, work, and thrive in their communities. The pandemic has affected this work in many ways. This survey, completed by 278 DSPs from Tennessee, gathered information about the experiences of DSPs intended to inform efforts to prepare for future waves of the pandemic.

WAGES

DSPs reported on their wages before the pandemic and on whether they received extra pay for pandemic-related risks. Many received extra pay, although states and businesses had varying levels of access to additional dollars to compensate essential workers.

DSPs reported an average mean hourly wage of $11.54 before the pandemic, which is higher than expected or typical based on previous studies (NCI, 2020).

Of those receiving extra pay:
- 4% received COVID-19 augmentation or bonus pay
- 90% didn’t receive COVID-19 augmentation or bonus pay
- 4% $0.01-$1.00 per hour
- 4% $2.01-$3.00 per hour
- 4% more than $3.01 per hour

SCHEDULES AND STAFFING

DSPs were asked to report on how the pandemic affected the number of hours they worked, where and when they worked, and how their role may have shifted.

- Worked more hours per week: 50%
- Worked the same hours per week: 24%
- Worked less hours per week: 6%
- Worked different shifts: 35%
- Worked in different settings: 23%
- Assigned additional responsibilities/different roles: 35%
- Furloughed/laid off/unemployed/facility closed: 3%
- Working remotely/telehealth now: 5%
- Lived in residence: 3%

The locations in which I work have been adequately staffed: 46%
If staff where I work display symptoms of COVID-19, they are guaranteed paid time off: 39%
SAFETY MEASURES

DSPs were asked to report on the kinds of personal protective equipment (PPE) provided by their employer, whether they had adequate training in using PPE, and other safety measures that were taken.

- **75%** gloves
- **32%** purchased fabric face masks
- **6%** goggles/safety eyewear
- **24%** homemade face masks
- **34%** medical-grade face masks (N95)
- **16%** gowns
- **22%** face shields
- **6%** neck gaiters
- **44%** disposable or paper face masks

I have had an adequate supply of PPE to keep myself and the people that I supervise safe: **72%**
I participated in a training on how to safely use PPE: **74%**
I have had resources about COVID-19 available to me: **89%**

REASONS FOR LEAVING DSP POSITION

The pandemic affected many aspects of peoples’ lives and their ability to work. DSPs reported on reasons that they or their co-workers were no longer working in direct support.

- **15%** testing positive for COVID-19
- **18%** quarantine due to COVID-19 exposure
- **11%** fear of becoming infected
- **10%** childcare issues (e.g. daycare closed)
- **5%** fear of infecting others
- **14%** family reasons (e.g. caring for someone with health issues, homeschooling children)

SOCIAL DISTANCING

DSPs were asked to gauge how well the people they supported were following social distancing measures.

DSP perceptions of social distancing practices of people supported:
- **27%** excellent
- **37%** good
- **12%** poor
- **23%** fair

We have had the space and ability to practice social distancing: **79%**
I have had information to offer to the people to whom I provide support that was conducive to their learning styles: **77%**
IMPACT OF ISOLATION ON PEOPLE SUPPORTED

Many people experienced social isolation during the COVID-19 pandemic. DSPs were asked about the consequences of increased isolation on the people they supported.

- difficulty addressing dietary issues: 8%
- difficulty addressing pain management: 1%
- other health issues: 7%
- decreased exercise: 46%
- missed going out into the community: 68%
- increased behavior issues: 36%
- increased mood swings and/or depression: 38%
- more anxiety: 34%
- boredom: 59%
- loneliness: 28%
- academic concerns: 2%

DEMOGRAPHICS, ROLE, AND SETTING

DSPs self-reported demographic information and the primary setting where they worked.

- American Indian/Native American: 2%
- Asian: 0%
- Black/African American: 26%
- White: 70%
- Another race: 0%
- Two or more races: 0%
- Hispanic: 4%

80% female
average age 44 years

- 46% family/individual homes
- 45% agency/facility sites
- 8% community employment

(52% of DSPs reported working in more than one setting)
