State Notes

Children ages 1-3 receiving Part C and/or Social Services Block Grant (Title XX) funding are included in the caseload beginning in FY 2016.

People waiting for services who received case management services were not included in the caseload in FY 2014. All people with DD served by the state IDD agency who are 16 years or older are entitled to Medicaid State Plan-funded Case Management services.

Prior to FY 2013, the number of nonstate group home settings serving one to three people was significantly over counted. The numbers reported from FY 2013 onward have been corrected.

Data for years not shown can be viewed in the [Chart Gallery](#) of the [RISP.umn.edu website](http://RISP.umn.edu). Survey questions and operational definitions can be found in the [Publications](#) section. See the FY 2016 report text for details about methodological changes that may have changed values reported from one year to the next (particularly for the waiting list questions).

Reading the State Profiles

Unless otherwise noted, the profile shows values furnished by the state IDD agency. Blank spaces or breaks in a trend line indicate years a data element was not collected or a state provided incomplete or no data. Large year-to-year changes often reflect changes in state data sources or methodology, the addition or termination of a funding authority, or inclusion of a narrower or broader set of recipients. The State Notes describe variations from the survey definitions, alternative data sources used, reasons for large year-to-year changes, and other factors affecting data interpretation.

Figure 1 shows the number people living in Medicaid Intermediate Care Facilities for People with Intellectual Disabilities (ICF/IID) between 1977 and 2016 and the number of Medicaid Waiver recipients with IDD between 1982 and 2016.

Figure 2 shows the average annual per person Medicaid ICF/IID and Waiver expenditures for the year ending June 30, 2016.

Figure 3 shows the number of LTSS recipients with IDD living in various residential settings on June 30, 2016. Setting types include the home of a family member, a person's own home, a host/family foster home, and IDD group settings by the number of LTSS recipients per home (1 to 3, 4 to 6, 1 to 6, 7 to 15, or 16 or more people). Data may be shown for the 1 to 6 people category even if a state did not furnish complete data for settings of 1 to 3 people and 4 to 6 people.

The Table shows the number of LTSS recipients with IDD living in settings of various types and sizes, and the number of people on the IDD agency caseload, or receiving or waiting for LTSS by year. It also shows average annual per person Medicaid Waiver and ICF/IID expenditures, and Medicaid Waiver and ICF/IID recipients per 100,000 of the state's population.
